

Latex Contour Pillow Use & Care

 @ Quokka Beds  @quokkabeds  productreview.com.au/b/quokka-beds

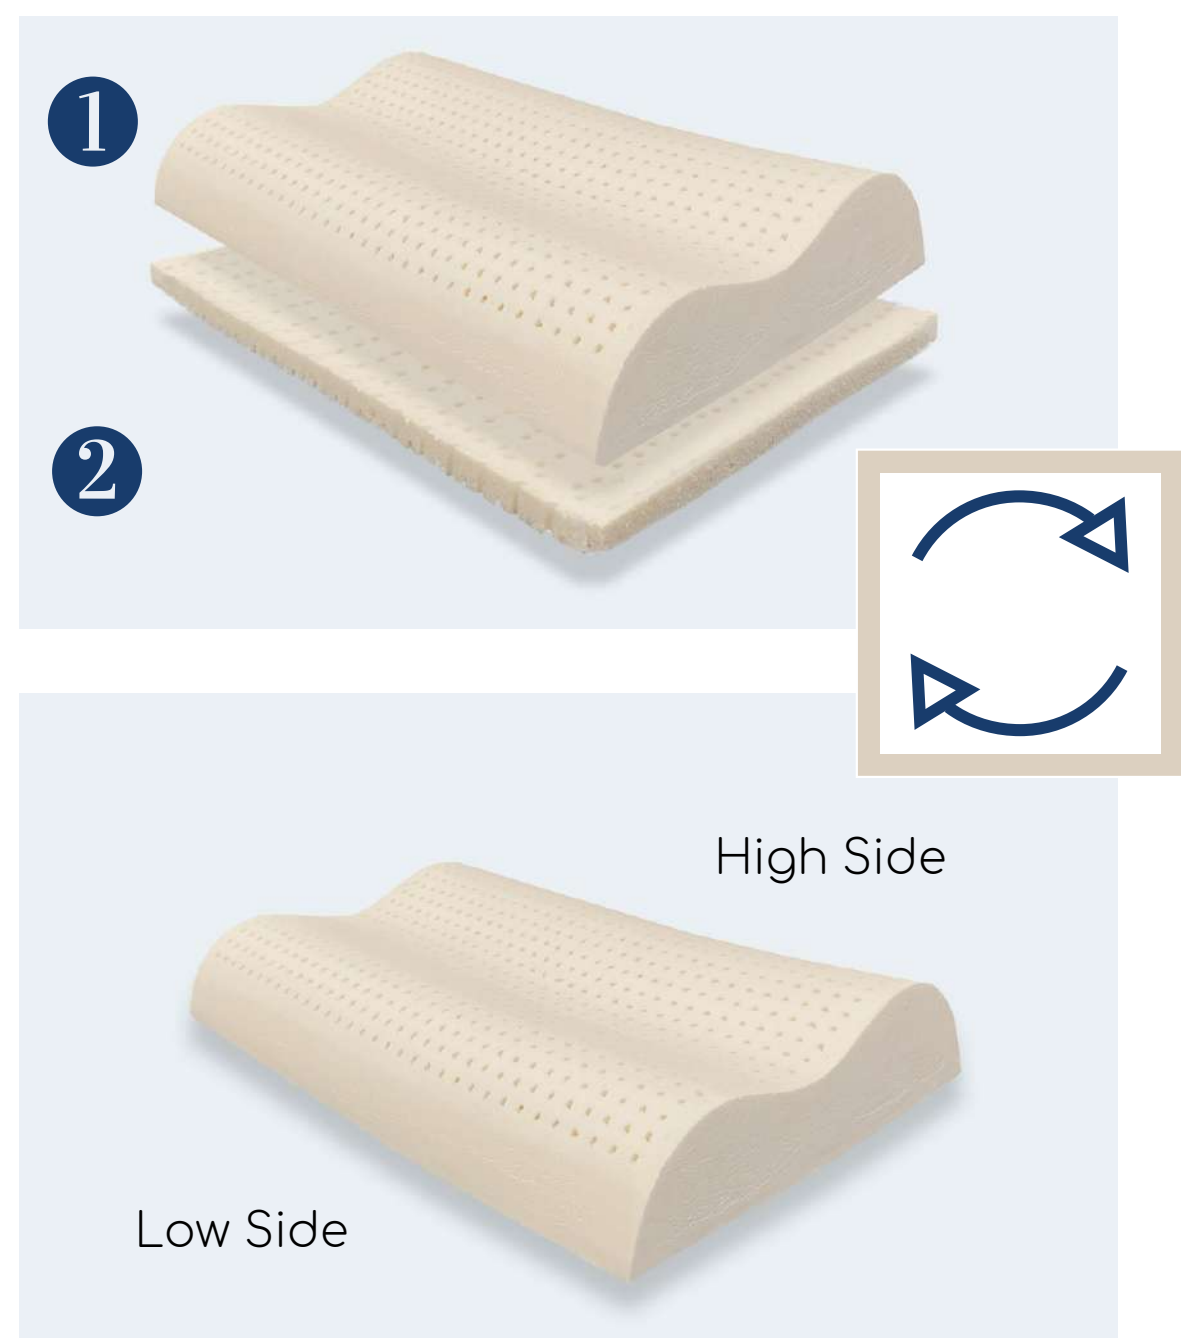

Unpacking

- Your pillow will come with box pieces of latex inside the cover
- You may need to adjust the cover slightly to align with the latex

What height setting should I use?

- Most sleepers will suit the low side + the bottom layer. If this feels too high or you solely sleep on your front or back, try this for at least a few days before removing layers
- Generally, side sleepers or those with broader shoulders will suit a higher setting - but front or back sleepers, or those with slimmer shoulders will suit a lower setting

Can I wash the cover?

- Yes! To remove the cover, flip over and unzip.
- Carefully unfold the cover, being careful not to tear on the latex.
- Machine-wash the cover on warm (Note: The cover is pre-washed and pre-shrunk)

Replacing the cover

- Lay it down with the zip facing up, and push the low-side of the pillow into the far corners
- Focus on aligning the 4 bottom corners first
- Once aligned, zip it up and pull on the cover to make any final small adjustments

Warranty & Care

- 10-year warranty against sagging.
- Spot clean cover with mild detergent
- Warm wash only. Air-dry.
