Step 1: Cover

Unzip and stretch out the cover on your bed

Step 2: Configuration

Medium-Firm (Feels 7 / 10)	Firm (Feels 8 / 10)	Extra Firm (Feels 9 / 10)
Medium	Medium	Firm
Medium	Firm	Medium

Medium (Feels 6 / 10)	Medium-Firm (Feels 7 / 10)	Firm (Feels 8 / 10)
Medium	Medium	Firm
Medium	Firm	Medium
Firm	Firm	Firm

Work out which order you should put the layers in, then find your first layer and place it on your bed.

If required, there is a small sticker on the corner of each layer:

Medium = D75
Firm = D85

Step 3: First layer

Carefully cut the packaging off , then shuffle the layer to align it evenly with the cover on all sides (important).

To move the layers, it can help to use a 'wave' motion, which shifts it away from you

Step 4: Remaining layer/s

Carefully align each layer with the layer below it, again ensuring the cover is even on all sides.

Don't worry if the cover seems too small, as the latex will stretch/compress.

Step 5: Zip it up!

Once aligned, carefully zip up the top layer of the cover.

Tip:

If the layers have bunched up on one side, 'wave' the mattress to realign them.

Happy sleeping!

Warranty & Care

- 20-year Warranty (more than a 10mm indentation in any layer)
- No need to rotate and do not flip.
- Spot clean cover with mild soap or cold machine wash only.
- Mattress protector recommended.
